SUMMARY

Cybersecurity professional with hands-on experience in application security, VAPT, cloud security, and security operations through client-facing engagements. Experienced in web and mobile application testing, vulnerability assessment and remediation, AWS security, security monitoring, and incident investigation using Burp Suite, Nmap, Splunk, and Wazuh.

SKILLS

Operating Systems: Windows, Linux, macOS
Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, OSI Model
Security: VAPT, SOC Operations, Cloud Security, Incident Response, Active Directory, Risk Assessment, OWASP Top 10, Performance Testing, Functionality Testing.
Cloud: AWS
Tools: Burp Suite, OWASP ZAP, Nmap, Wireshark, Metasploit, BloodHound, Splunk, Wazuh, Nagios, Grafana, k6
Scripting: Python, Bash, PowerShell, JavaScript
Version Control: Git, GitHub
CI / CD: Github Actions, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Cybersecurity Practitioner Associate Jul 2026 – Present
Secure369 Solutions Hyderabad, India

- Conducted web and mobile application VAPT across development and test environments, performing reconnaissance, vulnerability assessment, and validation using Burp Suite, Nmap, Scripts and related security testing techniques.
- Documented validated security findings, assessed security impact, and supported developers with remediation recommendations to address identified vulnerabilities.
- Supported the setup and security hardening of AWS environments across development, testing, pre-production, and tools environments, including security group and configuration management.
- Investigated Windows and Linux security events using Splunk and Wazuh, supporting alert analysis, log investigation, and incident triage.
- Participated in client-facing cybersecurity engagements involving application security, cloud security, vulnerability assessment, and security operations.

EDUCATION

B.Tech. Computer Science (Cyber Security) – Anurag University 2026

PROJECTS

- **Active Directory Security Lab** – Built an enterprise Active Directory lab to simulate authentication, privilege escalation, attack paths, and security hardening using BloodHound.
- **SOC Security Monitoring Lab** – Configured Splunk and Wazuh to ingest Windows Event Logs and Sysmon telemetry, investigate alerts, and practice threat detection workflows.
- **Web Reconnaissance Automation Tool** – Developed a Python-based reconnaissance automation tool to streamline information gathering and identify potential attack surfaces.
- **Secure Chat Application** – Developed an encrypted real-time chat application using Node.js and Socket.IO with authentication and role-based access control.

LEADERSHIP & ACTIVITIES

- Core Member, Hack The Box AU Club; organized CTF competitions and mentored junior members.
- Designed cybersecurity challenges for university CTF events and actively participated in Hack The Box and Blue Team Labs.
- Completed PwC and Deloitte cybersecurity job simulations focused on risk assessment, incident analysis, and security operations.

CERTIFICATIONS

- Practical Junior Penetration Tester (PJPT)
- Certified Red Team Analyst (CRTA)
- Blue Team Junior Analyst (BTJA)
- Google Cybersecurity Professional Certificate
- Cisco Ethical Hacker
